

MUHAMMAD AFZAAL HASSAN

Full-Stack Web Developer | MERN & PERN Stack | AI SaaS Builder | REST APIs

muhammadafzaalhassan51@gmail.com • +92 343 833 8266 • [linkedin.com/in/afzaalhassan](https://www.linkedin.com/in/afzaalhassan) • github.com/Afzaal162

PROFESSIONAL SUMMARY

Results-driven Full-Stack Web Developer with hands-on experience building and deploying production-grade web applications using the MERN and PERN stacks. Proven ability to architect responsive React.js frontends, scalable Node.js/Express.js REST APIs, and PostgreSQL/MongoDB databases — independently, end-to-end. Experienced in API integration, UI/UX implementation, Git version control, and cross-browser responsive design. Passionate about writing clean, efficient, maintainable code and delivering real products that solve real problems.

TECHNICAL SKILLS

Frontend	HTML5, CSS3, JavaScript (ES6+), React.js, Next.js, Tailwind CSS, Bootstrap, Responsive Design, Vite
Backend	Node.js, Express.js, RESTful API Design, JWT Authentication, Bcrypt, Nodemailer, Middleware, MVC Architecture
Databases	PostgreSQL (Neon Serverless), MongoDB (Mongoose ODM), MySQL, SQL & NoSQL Query Optimization, Schema Design
Auth & Payments	Clerk (Auth, Session Management, Subscription Billing), JWT, Bcrypt, Role-Based Access Control (RBAC)
Cloud & DevOps	Vercel, GitHub, Git/Version Control, Cloudinary, Postman, npm, CI/CD via GitHub, VS Code
AI & Integrations	Generative AI Integration, OpenAI API, AI SaaS Architecture, Third-party API Integration
Core CS	OOP, Data Structures & Algorithms, REST API Design, Debugging & Performance Optimization

PROFESSIONAL EXPERIENCE

Full-Stack Web Developer | Eziline Software House

Feb 2026 – Apr 2026

Rawalpindi, Pakistan

- Developed, maintained, and optimized modules for I-Portal — an enterprise employee management system handling HR workflows, attendance tracking, staff records, and role-based access control (RBAC) at organizational scale.
- Designed and integrated RESTful API endpoints; managed structured MySQL/PostgreSQL schemas for high-volume employee data with performance-optimized queries.
- Applied MVC architecture and OOP principles to write clean, scalable, maintainable code with reusable service layers and proper separation of concerns.
- Implemented multi-role authentication with secure role-based access control across admin and employee-facing portal views.
- Debugged and optimized backend systems, API endpoints, and frontend views to improve performance, reliability, and response times.

Full-Stack Developer (MERN) | Ezitech Institute

Oct 2025 – Jan 2026

Rawalpindi, Pakistan

- Built production-grade full-stack web applications using the MERN stack — implementing OOP principles across React.js frontends, Express.js REST APIs, and MongoDB data models.
- Engineered secure authentication systems with JWT authorization, bcrypt password hashing, and email OTP verification via Nodemailer.

- Developed a complete blogging platform with CRUD operations, user profile management, nested commenting, Cloudinary image uploads, and Vercel production deployment.
- Applied data structures and algorithms to optimize backend logic and enhance system performance across production builds.

KEY PROJECTS

Genesis — AI-Powered UGC Studio | [Live Demo](#) | [GitHub](#)

React.js · Node.js · Express.js · PostgreSQL · Clerk · Cloudinary · Stability AI · Fal.ai · Vercel

- Architected and shipped a full-stack AI SaaS platform solo that generates photorealistic UGC product images using Stability AI (SDXL) and converts them to videos using Fal.ai Stable Video Diffusion.
- Built a complete credits billing system, community gallery, async background video processing, and real-time polling — deployed on Vercel with decoupled frontend/backend architecture.
- Integrated Clerk for end-to-end authentication, Cloudinary for AI-processed media storage, and Neon PostgreSQL with Prisma ORM for persistent data management.

QuickAI — AI-Powered SaaS Platform | [Live Demo](#) | [GitHub](#)

React.js · Node.js · Express.js · PostgreSQL · Clerk · Cloudinary · Vercel

- Built a full-stack AI SaaS application solo featuring an AI article writer, blog title generator, image background remover, user dashboard, and community gallery with like/unlike functionality.
- Integrated Clerk for authentication, session management, and subscription billing (Free vs Premium plans) with protected route enforcement across frontend and backend.
- Resolved complex production challenges including CORS preflight failures, Vercel serverless cold-start behavior, and environment variable management across multi-service deployments.

Full-Stack Blogging Platform | MongoDB · Express.js · React.js · Node.js · JWT · Cloudinary · Context API · Vercel

- Built a complete blogging application with JWT-secured authentication, post CRUD operations, nested commenting, user profile management, and Cloudinary image integration.
- Managed global auth state with React Context API; deployed with production-grade CI/CD pipeline on Vercel via GitHub.

EDUCATION

Bachelor of Science in Computer Science

Nov 2020 – Nov 2024

Government College University, Faisalabad

Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Web Technologies, OOP, Software Engineering

CERTIFICATIONS

- What Is Generative AI? — LinkedIn Learning | Foundational understanding of AI/ML concepts and Large Language Models (LLMs)
- Introduction to Microsoft Excel — LinkedIn Learning
